ÉDITORIAL

Bienvenue au Forum EPFL 2023 !

Tout le comité de l'association a le plaisir de vous accueillir à la 41ème édition du salon. Nous avons œuvré durant une année afin de vous offrir une édition vous donnant la possibilité de rencontrer les représentants de plus de 200 entreprises et d'une centaine de start-ups. Cette année, Au même titre que l'année dernière, une journée spécialement dédiée aux ONGs a été mise en place suite à une forte demande de la part des étudiants. Ainsi, une douzaine d'ONGs ont répondu à l'appel afin de vous offrir l'opportunité d'échanger au sujet des différentes causes soutenues, et des potentielles carrières qu'elles appellent.

Nous nous réjouissons d'avance de cette 41ème édition du Forum EPFL. En effet, les entreprises se sont données rendez-vous au cœur du campus de l'EPFL du 9 au 13 octobre 2023. Fidèles au salon depuis plusieurs années ou récemment séduites par les talents de l'EPFL, elles ont à nouveau répondu présentes pour vous rencontrer.

Chaque année, le Forum EPFL fait en sorte de vous offrir un accès à une grande diversité d'entreprises, représentant tous les secteurs. Un vaste panel de secteurs vous sera présenté : du secteur de l'horlogerie à l'audit financier en passant par l'industrie pharmaceutique, la construction, l'agroalimentaire ou encore le service bancaire, sans oublier bien sûr les secteurs plus traditionnels de l'ingénierie, tous sont réunis car votre profil les intéresse ! Dès à présent, ces dernières ont accès à tous les CVs déposés sur notre plateforme forum.epfl.ch. Alors n'attendez plus pour ajouter le vôtre et entrez en contact avec les entreprises de vos rêves !

Nous vous invitons également à profiter pleinement des services offerts par le Forum EPFL. Malgré l'inquiétude que peut créer le passage à la vie active, nous mettons à votre disposition les outils pour faciliter cette transition. Au-delà des rencontres avec les entreprises, le Forum EPFL vous offre également une préparation en amont à travers la Skills Week, du 2 au 6 octobre, et au début de la semaine du Forum EPFL, lors du Lundi Get Ready. Ainsi, vous pourrez participer au cours de la semaine à nos différents ateliers et workshops, présentations d'entreprises, entretiens, déjeuners-contacts dans les meilleures conditions.

En espérant que votre expérience soit la plus agréable possible, nous vous souhaitons beaucoup de réussite au cours de cette semaine du Forum EPFL !

Le Comité Forum EPFL 2023

MOT DU PRÉSIDENT

Éditorial pour l'édition 2023 de Forum

Au fil des ans, Forum EPFL s'est hissé parmi les plus grands salons du recrutement de Suisse et d'Europe. La 41 édition, du 9 au 13 octobre prochain, s'annonce d'ores et déjà comme un succès. Six mois avant l'événement, quelque 180 entreprises étaient déjà inscrites, de même qu'une quarantaine de start-ups et des ONG. Les organisateurs - des étudiantes et étudiants de l'EPFL - peuvent être fiers de cette réussite !

Pourquoi un tel engouement? C'est devenu l'événement incontournable pour toutes les étudiantes et les étudiants à la recherche d'un stage ou d'un emploi. Et la réciproque vaut pour les entreprises et start-ups à la recherche de visibilité. Durant cinq jours, c'est un lieu de convergence et d'échanges pour près de 20'000 personnes qui offre une occasion unique de tisser des liens avec les entreprises et l'univers professionnel. Un accélérateur de rencontres entre les entreprises et les jeunes talents qu'elles viennent recruter au cœur des Hautes écoles. Au détour de discussions informelles, au cours d'entretiens, lors des workshops et des présentations se nouent ces contacts si essentiels pour se créer un réseau.

Pendant une semaine, les participant-e-s arpenteront les allées du SwissTech Convention Center afin de bénéficier de cet environnement idéal, en lien direct avec l'écosystème de notre École. L'EPFL, avec une offre novatrice, transdisciplinaire et de qualité, forme les meilleurs talents de demain, si nécessaires à la Suisse et au monde. Nos cursus font la part belle à l'esprit entrepreneurial et les diplômées et les diplômés en sont nourris. Que rêver de mieux pour qu'ils deviennent des moteurs de l'innovation dans les entreprises ?

A l'EPFL, nos étudiantes et nos étudiants développent leurs compétences, leurs talents et une formidable capacité d'adaptation, dont les grandes entreprises, PME et start-ups bénéficient à leur tour lorsqu'elles les engagent. Merci à Forum de contribuer à cette chaîne de valeurs et à toutes et à tous, étudiantes et étudiants, entrepreneuses et entrepreneurs. Je vous souhaite, une fructueuse 41 e édition.

Martin Vetterli, Président de l'EPFL

VENDREDI 27 OCTOBRE

18:00 - 02:00	Gala de clôture aux Portes des Iris
---------------	-------------------------------------

LA SEMAINE EN DÉTAIL

TOUT SUR NOS PRÉSTATIONS

Forum Get Ready - Lundi 9

Journée inaugurale et ultime occasion de vous préparer au Forum EPFL, ce lundi pourrait vous être profitable si vous n'avez pas pris part à la Skills Week ou si le stress commence à monter. En effet, notre comité vous a confectionné une journée de préparation de dernière minute. Shooting photo, correction de CV, atelier de gestion de la respiration et workshops vous attendent. Cette journée se clôturera par la traditionnelle conférence d'honneur.

Présentations d'entreprises - Lundi 9, Mardi 10, Mercredi 11

Les entreprises viennent à vous ! Elles vous exposeront leur philosophie, leurs objectifs, ainsi que leurs attentes. C'est une formidable opportunité d'établir un contact direct avec les sociétés qui vous intéressent, ou de découvrir des secteurs d'activité auxquels vous n'auriez sans doute pas pensé. Ces trois jours de présentations seront ponctués d'apéritifs vous permettant d'échanger directement avec les représentants de ces entreprises.

Retrouvez les horaires de toutes les présentations aux pages 22 et 23, sur notre site internet forum-epfl.ch ou encore sur votre application EPFL Campus.

Start-Up Day - Mardi 10

La Start-Up Day est la journée réservée aux start-ups. C'est un véritable Forum, condensé sur un jour, que nous offrons aux start-ups afin de vous permettre de les découvrir, les rencontrer et peut-être rejoindre l'une d'entre elles. Pour les entrepreneur-e-s en herbe, venez défendre votre projet de start-up au Student Corner et recevez le feedback d'experts; idéal pour démarrer votre propre aventure ! Intéressé-e par le développement durable ? Passez au Durability Corner pour rencontrer les start-ups qui mettent l'environnement à l'honneur.

Par ailleurs, plusieurs conférences de prestige autour de l'entrepreneuriat se tiendront ce mardi. La journée se clôturera par le désormais habituel concours d'éloquence. Venez montrer vos talents d'orateur devant un jury d'excellence avec, à la clé, de beaux prix et une expérience inoubliable.

ONG & OIG Day - Mercredi 11

Une journée spécialement consacrée aux ONGs a été mise en place pour la première fois depuis la création du Forum EPFL. Venez ainsi saisir l'opportunité de découvrir les différentes causes défendues par les diverses ONG et pour lesquelles vous pourrez peut-être vous engager.

Stands - Jeudi 12, Vendredi 13

Lors des deux derniers jours du Forum, vous trouverez les emblématiques stands des entreprises au SwissTech Convention Center. Venez y rencontrer les recruteurs et représentants afin d'échanger et d'établir un premier contact direct avec vos potentiels futurs employeurs, une rencontre qui pourra s'avérer décisive pour le restant de votre carrière !

Loges d'entretien * - Jeudi 12, Vendredi 13

Les loges d'entretien vous permettront de rencontrer les recruteurs et de passer un entretien formel. Ces entretiens sont essentiels pour décrocher un stage ou un emploi au Forum. Pour profiter de cette opportunité unique, connectez-vous sur notre site forum-epfl.ch avec votre compte Forum EPFL et repérez dans l'onglet "Loges d'entretien" les entreprises qui vous intéressent. Vous aurez alors la possibilité de soumettre un court texte de motivation décrivant vos ambitions et votre personnalité. Si votre profil intéresse l'entreprise, vous serez invité-e à un entretien privé lors de la semaine du Forum.

Les entreprises auront également la possibilité de vous inviter à un entretien via le site internet ou de manière spontanée en vous rencontrant sur les stands.

Retrouvez les modalités d'inscription sur notre site internet forum-epfl.ch.

Workshops * - Jeudi 12, Vendredi 13

Organisés par les entreprises, vous aurez l'occasion de réfléchir avec elles par groupe d'une trentaine ou d'une cinquantaine d'étudiants au maximum sur une ou plusieurs questions de leur choix. Encourageant l'interaction entre les étudiant-e-s et les représentants de chaque firme, ces ateliers sont également pour vous une opportunité de jauger l'environnement dans lequel vous travaillerez potentiellement tout en vous faisant remarquer par les recruteurs. Véritable moment d'échange, profitez-en également pour en apprendre plus sur la manière de travailler en entreprise et pour jeter un œil sur les activités concrètes de la firme.

Déjeuners-contact * - Jeudi 12, Vendredi 13

Les journées du Forum EPFL sont intenses, profitez alors d'une accalmie autour d'un repas en compagnie des représentants d'entreprise. Ces moments de discussion privilégiés vous offriront un cadre informel pour vous mettre en valeur, poser les questions de votre choix et sympathiser avec celle ou celui qui déterminera peut-être votre futur professionnel.

* Ces prestations sont réservées aux étudiants de l'EPFL et nécessitent une inscription sur : www.forum-epfl.ch

Description

MON 9 13:30 - 13:55 ROOM 5C

Transforming patients' lives through science

Are you passionate about using technology to make a difference in the world? Do you have an innovative mindset that thrives on exploring new possibilities and pushing boundaries?

Join us in transforming patients' lives through Technology. At BMS, we are leveraging digital innovation and information technology to get more medicines to more patients faster, in ways that enhance outcomes; from research and early development to drug development, manufacturing and the supply chain, and commercialization.

We invite you to join us for an exciting presentation on how we are using computer and data science, artificial intelligence (AI), and machine learning (ML) to accelerate and enhance our business and scientific pursuits. Discover how we are making extensive use of data-driven technology to conduct countless experiments per day, digitize and expedite our manufacturing and delivery of life-saving therapies, and decentralize our clinical trials to expand the reach of our medicines to even more patients around the globe.

At BMS, we have a range of job opportunities available in the digital space, from data scientists and software engineers to Project Management and Analyst roles.

Join us for an insightful presentation on our digital innovation and information technology at BMS, and discover how you can be a part of our innovative team.

Rollomatic is a private Swiss company, leader in the innovation of precision tool grinding and laser CNC machines. We are customer focused and provide complete manufacturing solutions for the grinding of precision tools, including wheel dressing and measuring finished parts. Our manufacturing methods and our precision assembly are based on our passion for Swiss engineering and craftsmanship. Our philosophy is demonstrated by our teams at all stages of the life of our products: from the design, through the assembly and Lean Manufacturing, all the way to the client service, advice and support. Since Rollomatic was founded in 1989 in Le Landeron (NE), the cutting tools needed for building planes, watches, smartphones, cars, and medical devices are designed and manufactured with continuous innovation and new grinding process. To ensure these developments, the R&D Laser and Software departments, also present in the Innovation Parks of EPFL and Biel, focus their research activities on the 4 th industrial revolution with topics involving software development, mathematics, micromechanics, robotics and data science. With our two innovation cells, we establish and host key collaborations with academia, offering relevant and exciting projects for students such as internships, master theses and PhDs. We are also regularly looking for new software developers, mechanical engineers and mathematicians.

Exploring the Intersection of Technology and Patient Care within BMS

Digital technology, when coupled with pharmacology has the power to genuinely transform clinical practice, patient outcomes, and our industry as we know it. Making doctors smarter and more efficient, and patients healthier and more empowered, and we are well-positioned to help lead that transformation..

Creating this future can't happen alone. And BMS is committed to being a strategic collaborator and the partner of choice for healthcare technologists and digital innovators aligned with our mission.

As we look forward, BMS will continue to identify where and how technology can most improve the quality of our patient's lives today and tomorrow. In this quest, we're prepared to take measured risks, learn vital lessons, and innovate faster for those who need these advancements most.

Description

In this workshop, we will explore the landscape in which BMS is operating and the ways in which we are leveraging technology to improve patient care and enhance the benefits provided by our medicines.

This workshop is a great opportunity to learn from experts in the field and network with like-minded individuals who share our passion for transforming healthcare through digital innovation. This workshop is also a precursor to our upcoming Hackathon, where we will collaborate on solutions that will transform patient care, among technologists and digital innovators recruited within the EPFL network.

Join us for this workshop and be a part of our mission to transform healthcare through digital innovation. Together, we can make a difference in the lives of patients around the world.

Huawei Research Center Switzerland: Shaping the Technologies of the Future

In this workshop, our multicultural team of leading Researchers will introduce the research work they do in the field of Future Computing Systems, Computer Vision and Machine Learning, Wireless and Future Storage Systems. There will be interactive activities and demos about the cutting-edge technology we shape.

14:30 – 14:35	Introduction
14:35 – 15:15	Future Computing Systems Lab
15:15 – 15:55	Wireless Group
15:55 – 16:35	Future Storage Systems Lab
16:35 – 17:15	Computer Vision and Machine Learning Lab
17:15 – 17:25	Exchange with our participants

Students will get the opportunity to meet and exchange with our Top Researchers and Lab Directors.

IMC TRADING**Titre**

FRI 13 09:30 - 12:25 ROOM 4BC

*IMC trading***Trading simulation :**

We'll challenge you with an assignment that will help you see how your skills apply to financial markets. Together with two of our traders/developers, you'll develop a trading strategy and test it on real-world data – a perfect opportunity to better understand the complexities in designing trading algorithms, and what it's like to do this at IMC. We will build our prototype in Python, so please be prepared. If you have no experience with Python then MATLAB will work as well. We'll also use the opportunity to give you more information about trading and technology at IMC and you'll have a chance to ask all your questions about our business, life at IMC and more. We hope you're as excited to meet us as we are to meet you!

Swisscom (Switzerland) Ltd

Applying CI/CD and Test Automation to build the next generation IP Network.

Description**SWISSGRID AG****Titre**

THU 12 09:00 - 11:55 ROOM 3C

Swissgrid AG

Until 2050, the Swiss power system will face a tremendous change. All nuclear power plants are going to phase. Electricity demand will increase due to the electrification of our daily lives and solar PV's share in demand will increase from around 6% in 2022 to about 40% in 2050. This volatile production brings new opportunities but also challenges, including the operation of the grid. Become part of the Swiss energy transition and foster innovation in the heart of the electricity system!

Description

La diversité des tâches au sein de l'administration fédérale est presque illimitée: Nos collaborateurs et collaboratrices arment la Suisse contre les cyberattaques, veillent à ce qu'une infrastructure de communication efficace soit disponible dans toute la Suisse, contribuent au remplacement progressif de l'énergie fossile en Suisse, assurent la construction et l'exploitation durables des infrastructures... et bien plus.

Le service à la société et l'égalité de traitement de nos collaboratrices et collaborateurs sont les éléments clés de notre engagement.

Qu'ils exécutent leurs tâches à domicile, dans des espaces de travail partagés ou en déplacement, les membres de notre personnel bénéficient de formes de travail mobiles et de l'équipement nécessaire à cet effet.

Nous promouvons le travail à temps partiel, les partages de poste ainsi que les congés sabbatiques afin de leur permettre d'organiser leur temps de travail de manière individuelle.

Leurs compétences sont déterminantes pour le succès et la pérennité de l'administration fédérale. C'est pourquoi nous mettons en place des programmes de formation et de perfectionnement sur mesure et de qualité.

Le salaire est adapté aux exigences de chaque poste et tient compte des qualifications des collaboratrices et collaborateurs. Nous récompensons leur engagement par une progression salariale basée sur les prestations individuelles ainsi que par l'octroi de primes.

Prenez la responsabilité de la Suisse et devenez membre de l'administration fédérale!

Presentation Tuesday 10th 12:30, Room 1C

Description

Alpiq is a leading Swiss energy services provider and electricity producer in Europe. We offer our customers comprehensive and efficient services in the fields of energy generation and marketing as well as energy optimisation. In our daily work for our customers, we develop customised and digital solutions that are reliable and sustainable.

We have been generating climate-friendly and sustainable electricity from carbon-free Swiss hydropower for more than a hundred years. Our power plant portfolio also comprises shares in two Swiss nuclear power plants as well as flexible thermal power plants, wind farms and photovoltaic systems in Europe.

As an international energy trader, we are active on all major European markets. With unique expertise in the field of flexibility marketing and cross-border trading, our staff work around the clock to secure the profits of our customers. Thanks to digital tools, we optimise electricity generation and consumption as well as the energy flow between producers, prosumers and consumers in order to stabilise the electricity grids.

Job offers

- › Graduate programs, internships, working student positions, junior positions

Required profiles

Alpiq offers a wide range of career opportunities for Bachelor and Master graduates as well as doctoral candidates.

Jobs at Alpiq might be especially interesting to students in the fields of Mechanical Engineering, Electrical & Electronic Engineering, Material Science & Engineering, Computer Science, Data Science, Computational Science & Engineering, Physics & Applied Physics and Mathematics.

WHAT WE DO

We provide services and support to other companies with our expertise spanning different complementary domains thanks to our multidisciplinary team.

MACHINE LEARNING

Machine learning techniques are now ubiquitous in the industry. With the current advances in the field, complex tasks can be fully automated. Find out how you could improve the efficiency of your company at large.

DATA ENGINEERING

Every business produces data that can be interpreted in order to improve numerous processes internally. We propose our experience in data management, analysis and visualization to ease their understanding.

WEB APPLICATIONS

Today, powerful and complex products can be created based on web technologies, providing many advantages. We have built many modern web applications and we would love to help you build yours.

HOSTING

Deploying critical services on robust, scalable and resilient architectures is key for any online business. This is why we develop and manage a state-of-the-art hosting framework to handle projects from design to production.

JOIN US!

Looking for a new challenge? We have various opportunities which may suit you.

CAREER

We are always looking for talented people to join our teams. If you have some experience in our core domains or technologies, we may be the right place for you.

INTERNSHIPS

We provide internship opportunities for you to gain firsthand practical experience outside of academia.

ACADEMIC PROJECTS

We provide support and guidance to students who wish to combine academic projects such as MSc. or BSc. projects with practical experience in a dynamic environment.

À PROPOS D'AUBEP

AUBEP SA développe depuis 2005 des solutions informatiques pour la gestion d'entreprise. C'est avec une équipe d'ingénieurs de l'EPFL qu'a été mis en place un nouveau concept de réalisation de logiciels garantissant flexibilité et évolutivité aux petites et moyennes entreprises.

Avec la collaboration de l'EPFL et plus précisément du professeur Claude Petitpierre (directeur du laboratoire de téléinformatique, LTI) la plateforme AUBEP est constamment perfectionnée aux besoins de l'industrie, la construction, les bureaux d'ingénieurs, entreprises de service, entreprises de commerce et institutions.

AUBEP SA est active principalement en Suisse et fournit pour le moment un support en langue française et anglaise.

AUBEP SA est composée d'environ 30 personnes répartis sur deux site (Yverdon-les-Bains et Sierre) et structuré par départements : le département conseil, la recherche et développement, le service IT et la conduite de projets.

Notre approche : chaque besoin est unique

Notre solution XRP est un logiciel Web très souple et modulaire. En plus des modules standards proposés, nous réalisons pour vous une solution de gestion parfaitement adaptée à vos besoins jusque dans les moindres détails. C'est pourquoi nous prenons un soin particulier à analyser et déterminer avec précision les besoins afin de proposer une solution parfaitement adaptée.

C'est en étant proche du terrain et des utilisateurs que nos services apportent une importante valeur ajoutée en transformant le logiciel en une réelle aide stratégique à votre entreprise.

Mais notre rôle ne s'arrête pas là. Le logiciel implanté peut toujours être optimisé et l'équipe d'AUBEP accompagne l'entreprise sur le long terme pour répondre continuellement aux attentes des utilisateurs et de l'équipe dirigeante.

Nos consultants travaillent donc avec vous en étroite collaboration, et s'appliquent à créer une relation de confiance durable. Nous serons disponibles et très réactif lorsque vous en aurez besoin, votre retour sur investissement est notre principal objectif.

Année de fondation	1998

Description

Axetris serves OEM customers with micro technology based (MEMS) infrared light sources, laser gas sensors, gas flow sensors & controllers and micro-optical components used in industrial, telecom, environmental, medical and automotive applications. Our multi-disciplinary and highly skilled engineering and manufacturing teams combine broad experience in design, manufacturing and metrology from MEMS components to advanced optical and electronic sensor modules. Axetris supports its customers with in-depth application know-how. Customers benefit from excellent product value, consistent high product quality and outstanding customer support. OEMs rely on Axetris worldwide as a competent partner for customer-specific solutions from concept to volume production. Axetris is ISO 9001:2015 certified and operates its own 6-inch to 8-inch wafer MEMS foundry for its own products and contract manufacturing for external customers. A wafer back end, a sensor assembly and calibration facility under clean room conditions completes the manufacturing infrastructure of Axetris.

Activité(s) spécifique(s) : Micro technology (MEMS), infrared light sources, laser gas sensors, gas flow sensors & controllers and micro-optical components.

Offres d'emploi

Your passion for materials science, physics, software or MEMS-based manufacturing technologies is a perfect match. At Axetris, we are committed to maintain our leading position in high-performance micro optics and gas detection through continuous investments in curious brains, state-of-the-art equipment and process excellence. To accomplish our mission, we follow a cooperative culture, we work in a modern environment and we enjoy an awesome scenery from our roof-top terrace. What else you need?

Profils recherchés

Studies in microtechnology, materials science, electronics, physics, engineering or equivalent are important fundamentals. The ideal candidate has practical experience in semiconductor manufacturing technologies or in the design of MEMS-based components. We are looking for a responsive personality, who will help us to bridge the gap to unique solutions for unmet customer needs. Your open mindset, pragmatic and sustainable approach will be a valuable seed of inspiration to us.

Join us and shape the energy future!

As the largest Swiss producer of renewable energies and an international leader in energy trading and the marketing of solar and wind power, we offer students, doctoral candidates and university graduates the best conditions for a challenging and varied start to their careers.

Description

Parmi les principales banques de Suisse, la BCV est numéro un sur le marché vaudois. L'une de ses forces réside dans sa proximité avec quelque 2000 collaboratrices et collaborateurs et près de 60 agences. La BCV propose une grande variété de services et contribue au développement de l'économie vaudoise. Cotée en bourse, elle est notée AA par Standard & Poor's. Dans le cadre de sa mission et des principes de responsabilité d'entreprise, la BCV soutient chaque année quelque 650 associations et événements à vocation sportive, culturelle et sociale. En tant que banque universelle, elle recense près d'une centaine de métiers. Elle regroupe tant les activités du conseil aux particuliers et aux entreprises que l'Asset Management, le Trade Finance et les métiers de support nécessitant des compétences de gestion de projets et d'informatique. La prise de décision s'y fait localement sous la responsabilité d'une équipe dirigeante proche de ses collaboratrices et collaborateurs.

Description

Travailler chez nous est loin d'être monotone : projets passionnantes et missions ambitieuses, travail d'équipe collégial impliquant des contacts avec des experts exerçant dans les disciplines les plus diverses - sans compter que l'on est considéré comme une personnalité à part entière et soutenu dans son développement personnel. Tous ces facteurs contribuent à faire du travail chez nous un enrichissement. Le projet est au coeur de nos pensées et de nos actions. Les équipes de projet sont formées de manière à ce que les exigences techniques soient parfaitement satisfaites, indépendamment de la structure de notre organisation. Le travail implique donc la participation des différents domaines. Les hiérarchies sont très horizontales. Notre culture est basée sur la confiance et par conséquent sur l'ouverture d'esprit et l'honnêteté. Nos collaborateurs effectuent leurs tâches en prenant les responsabilités qui s'imposent et en attachant une importance toute particulière à la qualité. Ils savent qu'ils pourront compter sur le soutien nécessaire, et ce, même dans les moments difficiles.

Activité(s) spécifique(s) : Conseil et planification dans le domaine des services d'ingénieur

Pre-Hiring Internship & Jr Consultant - Geneva

Your tasks:

Globalization and digitalization, social and environmental impact, changing business models, the quest for competitiveness, the need for flexibility and responsiveness, etc. It is in this complex economic context - involving paradigm shifts - that managers must define their company's strategy and their need for operational excellence, regardless of their sector of activity.

As part of our strategy to strengthen our local presence in Western Switzerland, you will be part of our Geneva multi-disciplinary team, with objective to become the trusted advisor of local clients in their major transformations :

Work in project team, under the supervision of a senior manager, to help client improve and transform their organizations and operations

Support the project team with your expertise in one or more areas: strategy, business model, organization design, performance improvement, process redesign, sustainability, enterprise applications

Perform impactful quantitative and qualitative analysis, document preparation, research and project management

Further develop your skills around Capabilities and/or Industries

Support the acquisition of customers and projects in the Romandie area

Actively build a network in these areas within Switzerland as well as collaborate with our strategic partners

That's how you score points with us:

- Successful completion of a bachelor's or master's degree in engineering, business, economics or similar
- At least three years of experience in management consulting
- Experience in operational and digital transformation including strategy, business model, process and organizational optimization, enterprise application
- Proven analytical and problem solving skills (quantitative and qualitative)
- Ability to communicate your findings and the value they bring to clients with impact orally and in writing
- Knowledge of an Industry (ideally Consumer Goods, Luxury or Energy) or a particular corporate function (e.g. Strategy, Finance) a plus
- Business fluent in French and English, both written and spoken (German is a plus)
- Enthusiastic and proactive personality

This is how we score points with you:

- Dynamic working environment in international teams with diverse backgrounds
- Insight into different companies and industries as well as new challenges on exciting projects
- Various opportunities to grow professionally and personally and to shape your career yourself
- Numerous training and coaching opportunities
- Flexible working time models with modern employment conditions
- Monthly events organized by employees for employees

Description

We are a global biopharmaceutical company whose mission is to discover, develop, and deliver innovative medicines that help patients prevail over serious diseases.

When you join BMS, you are joining a diverse, high-achieving team united by a common mission. Here, you'll get the chance to grow and thrive through opportunities that are uncommon in scale and scope. You'll pursue innovative ideas while advancing professionally alongside some of the brightest minds in biopharma. With our emphasis on inclusion, employee engagement, and collaborative teams, you can expect to find dynamic support and unique resources to drive your career forward.

If, like us, you believe in the power of science to address some of the most challenging diseases of our time, then you'll fit right in as we search for the next breakthroughs in biopharma. Our commitment to patients inspires us and guides our actions as responsible corporate citizens. In a scientific, business or supporting function, there's no better place to do some of the most interesting and meaningful work of your career.

Presentation Wednesday 11th
09:00, Room 1C

Description

Hil! We are Camptocamp, a Swiss service company founded in 2001 in the field of Open Source software with great expertise in the areas of:

* Enterprise Resource Planning software with Odoo (ERP) * IT Management Systems * Geo-graphic Information Systems (GIS)

Our services include consulting, implementation, training, maintenance, support and R&D. In addition, Camptocamp has sophisticated competencies in consulting and sales of subscriptions for enterprise solutions in the Open Source environment, such as the Red Hat or Suse portfolio.

We have 170 employees with offices in 3 countries: the headquarter in Switzerland (Lausanne, Olten and Bussigny), two branches in France in Paris and Chambéry and our German branch in Munich (Camptocamp Germany GmbH).

What makes Camptocamp special is our highly qualified staff, our relentless focus on customer value, and our strong commitment to the «ecosystem» of the Open Source software solutions we use by maintaining very close relationships with the editors of the respective products.

Field(s) of activity : Open Source, Geospatial, ERP, Infrastructure Solutions

Job offers

› We are constantly looking for Front end and Full Stack Developers, ERP Business Analyst, ERP Project Managers, Cloud Native Engineers. Our young and dynamic company offers a motivating environment where every individual counts. At Camptocamp, people are more than their jobs. It means we support personal activities and projects by providing flexibility. Check out our site for current openings: <https://www.camptocamp.com/career>

Required profiles

If you have a bachelor/master in IT, it is brilliant, but most of all we are looking for motivated employees who:

- › Have a passion and willingness to participate in Open Source communities.
- › Have an entrepreneurial and innovative mind.
- › Have a good understanding of Agile development practices.
- › Enjoy working in a collaborative culture.

Description

Citec est un groupe international de bureaux d'études spécialistes de la mobilité depuis 25 ans. Aujourd'hui, nous fédérons près de 150 collaborateurs dans 9 agences, en Suisse, France et Italie. Nos ingénieurs apportent leurs conseils aux collectivités territoriales et acteurs de la mobilité urbaine : planification des déplacements, études de circulation et stationnement, maîtrise d'œuvre de projets TCSP, régulation de trafic, exploitation d'infrastructures transport, études de mobilité douce. À cette diversité thématique, s'ajoute une diversité géographique de nos implantations diverses et nos projets à l'international.

Plus largement, le groupe Citec est constitué de sociétés dont l'expertise couvre toute la chaîne de la mobilité : Ingénierie des transports (Citec), Mobilité des marchandises (Interface Transport), Ingénierie événementielle (Playground), Solutions géoinformatiques (arx iT), Acquisition de données (DataCollect). Des synergies et passerelles entre nos structures offrent des opportunités supplémentaires pour booster votre carrière.

COGNEX

Description

Cognex Corporation designs, develops, manufactures, and markets a wide range of image-based products, all of which use artificial intelligence (AI) techniques that give them the human-like ability to make decisions on what they see. Cognex products include machine vision systems, machine vision sensors, and barcode readers that are used in factories and distribution centers around the world where they eliminate production and shipping errors. Cognex is the world's leader in the machine vision industry, having shipped more than 3 million image-based products, representing over \$9 billion in cumulative revenue, since the company's founding in 1981. Headquartered in Natick, Massachusetts, USA, Cognex has offices and distributors located throughout the Americas, Europe, and Asia.

Job offers

The Deep Learning team in Fribourg is looking for new colleagues to develop the future of Cognex technology. Having no legacy code to maintain allows us to move fast and chose the latest and coolest technologies.

What you will do:

- › Develop technology used in Cognex Deep Learning products
- › Optimize algorithms for embedded platform
- › Define and develop to the Cognex Cloud platform
- › Research on state of the art machine learning algorithms applied to industrial images

Required profiles

The ideal candidate is a pragmatic software developer who demonstrates a can-do attitude and enthusiasm for learning and applying new development tools.

- › Master degree or PhD in engineering
- › Excellent programming skills
- › Computer vision knowledge
- › Deep Learning experience
- › Algorithmic development
- › Cloud computing
- › Embedded computing
- › Good presentation, communication, organizational and interpersonal skills

Description

Confinale is an IT consulting and software development company that supports banks in regulatory and digital banking matters. The company was founded in 2012 as a specialised consultancy for financial services providers in relation to the introduction of the final withholding tax. Since then the number of full-time employees has grown to over 120 (business analysts, developers, lawyers, regulatory specialists) and we can already count over 30 banks in Switzerland and abroad as our valued clients.

With our consulting and development teams, we cover the entire process over the course of an IT project. The range of services extends from the consulting and conception phase, through the analysis and design phase, to actual development, implementation and IT maintenance.

Field(s) of Activitie(s) : Wealth Advisory, Tax, Compliance, Regulatory Reporting and Credit Business

Job offers

Confinale offers you a stable workplace for your career goals, support from experienced managers throughout your external and internal training. Our team represents the core value of our company; therefore, we place great emphasis on assuring that you will feel welcome and are integrated into our Confinale family. At Confinale you will work in a dynamic environment that is at the cutting edge of the banking and financial sector and have excellent opportunities to develop your career.

 - > Good German and English language skills

Are you among the best?!

So are we! Thanks to a network of around 700 renowned companies, we have become one of the most influential recruiters in Switzerland. Let us write part of your success story!

What do we do?

We can open the doors to your dream job in technology, engineering, consultancy or finance. Our many years of experience mean that we can provide assistance for university graduates, experienced specialists and managers to plan and realize their next career step and act as intermediaries with potential employers. At the same time, we make the ideal partner for companies who would like to find people to take up key positions quickly, securely and for the long term.

What are the benefits for you?

- Free advice, including a CV check and interview training
- We'll save you time and the hassle of administrative procedures during the application process
- Better chances of success at job interviews
- Personality analysis using the Insights MDI® career check
- Professional career coaching
- Access to exciting positions and companies
- Realization of your desired career step

How does it work?

First of all, we get to know you through a personal interview. Then we analyze your strengths and weaknesses, your potential and your career wishes, and prepare you specifically for your job interviews. This means we'll be in a position to sharpen your profile and convey your market value. With our active application coaching, we'll guide you towards job interviews and will assist you through the entire application process right through to the signing of the job contract. Our joint goal: a perfect start to your career!

Find your dream job with us – we look forward to meeting you!

Description

FACING THE CHALLENGES OF OUR TIME

CSEM is a Swiss technology innovation center developing advanced technologies with a high societal impact, which it then transfers to industry to strengthen the economy. The non-profit orientated, public-private organization is internationally recognized, and works to support the disruptive activities of companies in Switzerland and abroad. CSEM operates in the domains of precision manufacturing, digitalization, and sustainable energy. To accomplish its mission as gateway between research and economy, CSEM's more than 550 employees from 46 countries collaborate with leading universities, scientific institutions, research institutes, and industrial partners. With its six sites in Allschwil, Alpnach, Bern, Landquart, Neuchâtel and Zurich, CSEM is active all over Switzerland.

Field(s) of activity : Technological innovation - R&D

Description

Eaton is an intelligent power management company dedicated to improving the quality of life and protecting the environment for people everywhere. We are guided by our commitment to do business right, to operate sustainably and to help our customers manage power — today and well into the future. By capitalizing on the global growth trends of electrification and digitalization, we're accelerating the planet's transition to renewable energy and helping to solve the world's most urgent power management challenges.

Field(s) of activity : We solve power management challenges through our industry leading electrical, aerospace, hydraulic and vehicle products and services

Job offers

- Are you ready to make a difference at Eaton? Fast-track your development through rotational assignments in different locations, with exposure to multiple businesses by joining our Leadership Development Program or join an entry-level position to gain experience with our global organisation and continue developing your skill sets. Our non-rotational roles provide exciting opportunities that allow you to grow. Visit us at our booth and explore the opportunities Eaton offers to you across EMEA!

Required profiles

- Transform your talent into a career. We are looking for geographically mobile, talented and ambitious people with STEM (science, technology, engineering, and mathematics) background who are eager to learn and passionate about helping to solve the world's most urgent power management challenges.

I had plenty of opportunities to hone my skills and have a real impact on different projects throughout Evoq.

Description

At Edgelab (2013) and Evoq (2018), we build solutions that enable banks to provide highly personalized wealth management services at scale.

Throughout the year, we bring interns from various academic backgrounds to work along with full-time professionals. Together, they tackle real-world business challenges - and interns have a chance to become full-time employees.

You can take many paths within our company - each involves collaborating with colleagues across multidisciplinary teams and working on challenging high-impact projects.

Working with us means: - You will gain experience being part of projects ranging from product development to client delivery. - You will have the opportunity to work independently and to put your theoretical knowledge into practice. - You will get an assigned supervisor who will support you during your internship or master thesis.

If you are passionate about investing and technology and want to learn and grow continuously, we have a space for you.

Description

In a world that's changing faster than ever, our purpose acts as our 'North Star' guiding our more than 300,000 people providing the context and meaning for the work we do every day. We help digital pioneers fight data piracy; guide governments through cash-flow crises; unlock new medical treatments with data analytics; and pursue high quality audits to build trust in financial markets and business. In other words, working with entrepreneurs, companies, and entire countries to solve their most pressing challenges. Through our four integrated service lines – Assurance (including Audit), Consulting, Strategy and Transactions, Tax and Legal – and our deep sector knowledge, we help our clients to capitalize on new opportunities and assess and manage risk to deliver responsible growth. We believe a better working world is one where economic growth is sustainable and inclusive. We work continuously to improve the quality of all our services, investing in our people and innovation.

Job offers

- › Assurance: interns, assistants, seniors and above
- › Consulting: technology and business interns, consultants, senior consultants, managers and above

Description

L'environnement économique et les produits financiers ont énormément évolué avec des produits nettement plus attractifs et intéressants. A l'époque, comprendre un produit était simple et clair pour tout un chacun. De nos jours, les solutions proposées par les banques et compagnies d'assurance sont plus complexes et requièrent un niveau élevé de connaissances des marchés financiers.

Les compétences de nos planificateurs financiers permettent de répondre aux attentes de nos clients et de leur conseiller les produits les plus performants et attractifs sur le marché, correspondant à leur profil de client et leurs objectifs.

FCG Private Finance a développé son propre outil d'analyse avec un grand groupe spécialisé dans le développement de la sécurisation de projets informatiques et digitaux. Le niveau de sophistication de cet outil de conseil intégré dans notre CRM représente une avancée sans précédent pour la planification financière. Notre neutralité et plus de 40 partenaires financiers nous permettent de conseiller nos clients au plus proche de leurs intérêts.

Activité(s) spécifique(s) : Planification financière

Offres d'emploi

FCG offre un large éventail d'opportunités professionnelles pour tout étudiant qui se lance dans la vie active. Dans chacun de nos cabinets de conseil, un coach dédié t'accompagnera pour une intégration réussie et assurer ton futur en tant que planificateur financier.

Inscris-toi et prenons le temps de faire plus ample connaissance.

Speed meeting ~30 min, jeudi 12 octobre de 9:00 à 17:00.

Profils recherchés

Tu aspires à évoluer en explorant de nouvelles perspectives, à agir de manière indépendante ? Nous recherchons des collaboratrices et collaborateurs talentueux, curieux, qui aiment faire la différence et osent poser des questions pour progresser, tout en restant fidèle à eux-mêmes. En rejoignant notre société, tu trouveras du plaisir, de l'épanouissement et une véritable éthique de conseil.

Ces éléments sont nos valeurs et la clé du succès pour tout conseiller financier à l'écoute de ses clients.

Description

Actif·ve·s en Suisse occidentale, nous aidons nos client·e·s à réaliser leurs projets en fournissant des solutions énergétiques globales, efficaces et durables, qu'il s'agisse de production et de distribution d'électricité et de chaleur, d'installations électriques, de domotique, de mobilité douce, de climatisation ou de traitement de l'eau.

Les quelque 2'500 collaborateur·rice·s, dont 280 apprenti·e·s, de Groupe E constituent sa principale richesse. Par leurs compétences, motivation et engagement, ils·elles permettent aux sociétés du groupe d'évoluer avec succès dans des marchés toujours plus concurrentiels.

Ouverture, respect et durabilité sont les trois valeurs constitutives de la culture d'entreprise du groupe. Au-delà de cette culture nous voulons assurer des conditions de travail agréables et des opportunités de développement à l'ensemble de nos collaborateur·rice·s: par exemple en favorisant la formation, le perfectionnement et l'acquisition de compétences multiples. La diversité des métiers et des types d'organisations au sein même du groupe offre de nombreuses opportunités.

Description

Holcim (Suisse) SA est l'un des principaux fournisseurs suisses de solutions de construction innovantes et durables dans les domaines du bâtiment, du génie civil et des infrastructures. Sur ses 55 sites à travers la Suisse, notre entreprise produit du béton, des granulats et du ciment et recycle des matériaux de démolition en produits préservant les ressources. La durabilité figure au cœur de ses activités: en tant que précurseur dans le développement de solutions d'avenir, Holcim Suisse s'est fixée pour objectif de produire d'ici 2050 des matériaux de construction climatiquement neutres et entièrement recyclables. Pour atteindre cette vision, Holcim mise sur l'économie circulaire et réduit son empreinte carbone tout au long de la chaîne de création de valeur. Holcim Suisse est une filiale de la société Holcim Ltd., présente à l'échelle mondiale, et emploie en Suisse 1'230 collaborateurs répartis sur trois cimenteries, 16 gravières, 36 centrales à béton et 4 plateformes de recyclage.

Offres d'emploi

Nous proposons régulièrement des stages en relation avec nos différents projets liés aux matériaux de construction, à l'économie circulaire et à la durabilité ou dans le cadre de la digitalisation. De même nous offrons des opportunités professionnelles à temps plein ou à temps partiel, dans différents domaines techniques et secteurs de notre organisation. Description

Huawei's vision is to enrich life through communication. We are a fast growing and leading global information and communication technology solutions provider. With our three business units Carrier, Enterprise and Consumer, we offer network infrastructure, cloud computing solutions and devices such as smartphones and tablet PCs.

Among our customers you can find 45 of the world's top 50 telecom operators, and one third of the world's population uses Huawei technologies. Huawei is active in more than 170 countries and has over 200,000 employees of which more than 80,000 are engaged in research and development. With us you have the opportunity to work in a dynamic, multinational environment with more than 150 nationalities worldwide.

We seek and reward talent. At Huawei, if you are dedicated to creativity, engagement of technical risks and delivery of target-driven results, your efforts will be rewarded with outstanding career prospects.

With 27 sites across Europe and 2000 researchers, Huawei's European Research Institute (ERI) oversees fundamental and applied technology research, academic research cooperation projects, and strategic technical planning across our network of European Research facilities. Our new Research Center located in Zurich, Switzerland, focuses on research in the area of Computing Systems, Wireless, Storage Systems, Computer Vision and Machine Learning, Artificial Intelligence, Neuromorphic Computing, Digital Power, Intelligent Cloud and Healthcare Technologies.

Description

Enriching Lives Through Innovation Huntsman embraces the entrepreneurial spirit of our founder, Jon Huntsman, and his core values of honesty, integrity, respect and responsibility. For 50 years, our employees have been using science and ingenuity to create innovations that play a critical role in the everyday lives of many millions of people. As a global chemicals company, Huntsman's work forms the building blocks for countless consumer and industrial products that are part of your everyday life. We serve a broad and diverse range of consumer and industrial end markets, including: Aerospace, Automation, Robotics and Engineering, Automotive and Transportation, Building and Construction, Electronics, Energy, Furniture and Bedding, Industrial Manufacturing, Sports and Leisure. Huntsman recognizes the important role we play in creating a more sustainable future. Our innovative solutions are the catalyst that enables 80% of the economy to reduce emissions. These contributions to a low-carbon economy can help make society's goal of carbon neutrality a reality.

Field(s) of activity : Adhesives, composites, formulation products, MDI-based polyurethanes, amines, maleic anhydride and carbonates

Description

Basée à Sion (VS), HYDRO Exploitation SA est un prestataire de services de premier plan actif principalement dans l'exploitation et la maintenance d'aménagements de production électrique. Sous un même toit, nous réunissons l'ensemble des compétences spécifiques à notre métier, du personnel de maintenance à l'ingénierie. Nous occupons 400 collaborateurs répartis du Haut-Valais au Jura vaudois.

Grâce à notre savoir-faire unique, nous proposons des prestations à haute valeur ajoutée répondant aux besoins variés de nos clients, ainsi qu'aux standards de qualité les plus exigeants.

Notre portefeuille de services s'adresse aux entreprises électriques, aux collectivités publiques, aux entreprises de transport de même qu'aux industries.

Nous sommes principalement actifs en Suisse et intervenons ponctuellement à l'étranger.

Activité(s) spécifique(s) : Maintenance d'aménagements hydroélectriques et prestations pour producteurs électriques, collectivités publiques, l'industrie et les transports.

	IAESTE SWITZERLAND
Stand	Friday 13th F01
Presentation	Monday 9th 12:00, Room 5C

Description

IAESTE Switzerland is a member of the IAESTE A.s.b.l. international exchange organisation and is a non-profit association. We help students of science and technical disciplines, as well as business and architecture, to find their ideal internship abroad. We facilitate the process from start to end: we select quality, paid placements to ensure students receive a valuable professional experience. We support applicants throughout the recruitment process in order to give them the best chance of securing a placement. We also assist with visa requests and lodging to make sure the move abroad is as smooth as possible. Our volunteers onsite in each member country then help ease with cultural integration by providing support and social activities during the internship. There are over 80 member countries worldwide, providing ample and diverse opportunities to develop both professional and personal skills through valuable cultural and work experiences. Our internships range from 6 weeks to 12 months and are all paid.

Field(s) of activity : Science, technical, business and architecture internships worldwide

Job offers

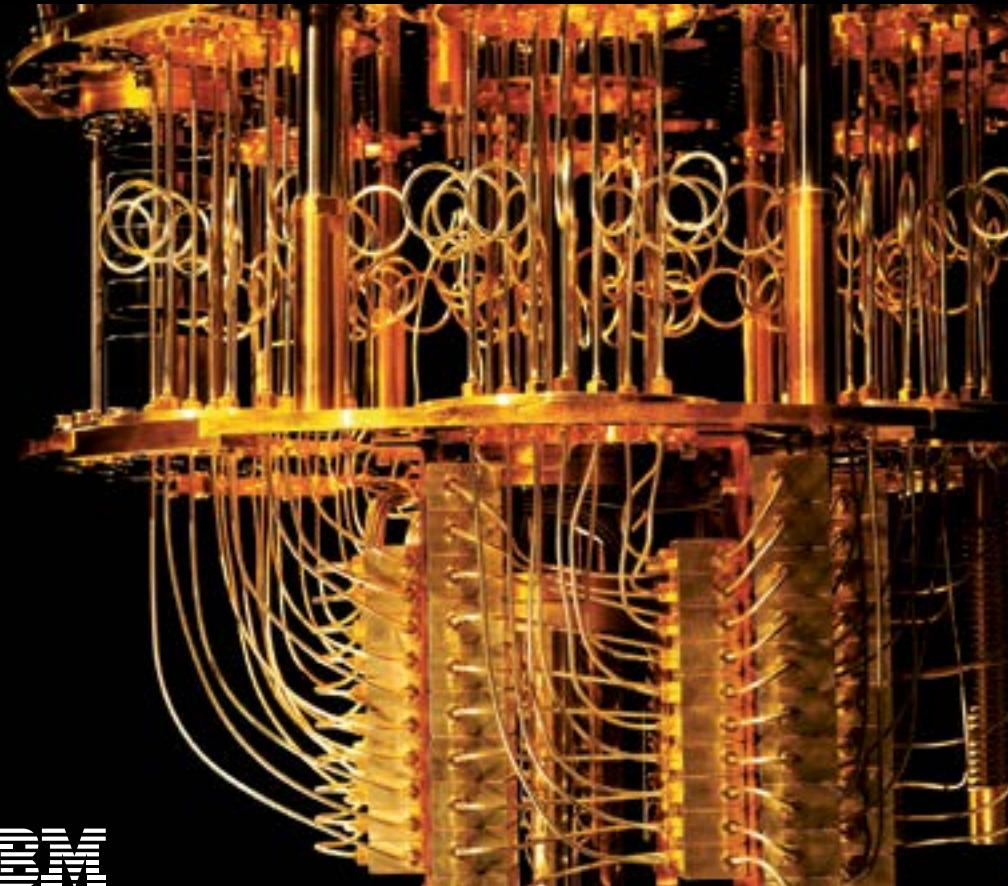

- › IAESTE offers a wide range of internships abroad focused on science, technical, business and architecture disciplines. Our internships have the following benefits:
 - › They are paid
 - › You receive assistance during the application procedure
 - › Support with visa requests and lodging
 - › Tutoring and social activities organized by our onsite volunteers during the internship

Required profiles

- › To be eligible for our placements, you must be:
 - › BA (4+ semesters) or MA student
 - › Enrolled at a Swiss university
 - › Between 19 and 30 years old

How will you change the world?

IBM Research

Stand Thursday 12th F17

Presentation Tuesday 10th 13:00, Room 5BC

Description

IBM Research has defined the future of information technology with approximately 3,000 researchers in 11 labs located on six continents. IBM Research has produced six Nobel Laureates, 19 inductees in the National Academy of Sciences, 20 inductees into the U.S. National Inventors Hall of Fame. Our scientists have won 10 U.S. National Medals of Technology, 5 U.S. National Medals of Science, and 6 Turing Awards, amongst others. IBM Research - Zurich is world-renowned for its outstanding scientific achievements -- most notably Nobel Prizes in Physics in 1986 and 1987 for the invention of the scanning tunneling microscope and the discovery of high-temperature superconductivity. Other key innovations by IBM include: FORTRAN, magnetic disk storage, DRAM, relational databases, Deep Blue, Racetrack Memory, speech recognition, RISC microprocessor architecture, excimer laser surgery, quantum computing, neuromorphic chips, and most recently Watson, IBM's generative AI model. IBM Research is dedicated not only to fundamental research, but also to exploring and creating innovation.

Description

IMC is a leading global market maker, using algorithmic trading and advanced technology to buy and sell securities on multiple trading venues worldwide. We provide liquidity to the financial markets, driving efficiencies for buyers and sellers. We operate globally from offices in Europe, the US and Asia Pacific. Our employees work closely together in multidisciplinary teams, making our success possible.

Technology - At IMC, technology is not a department, it is at the heart of everything we do. Our technologists push the limits of possibility, and then look beyond. In our fast-paced environment, short feedback loops mean projects worked on in the morning can enter production the next day. Trading – Although our traders come from many backgrounds they all have one thing in common: they are at their best solving complex problems. Their insight into global events, market shifts and pricing ensure we are trading in the right place, at the right time.

Isomorphic Labs is a digital biology company working to redefine drug discovery with the power of artificial intelligence. We are an Alphabet company (parent company to Google) launched from Alphabet's DeepMind in 2021. We were founded and are led by world-renowned AI researcher Demis Hassabis. Using our AI-first approach to drug discovery and biology, we aim to usher in a new era of biomedical breakthroughs to find cures for some of humanity's most devastating diseases.

The company offers an entrepreneurial culture with a deep commitment to our work, ample capital to support it and access to enormous compute resources, utilising the latest Google infrastructure at scale. We strive to offer a great work experience, set apart from others by our talent, culture, collaboration and integrated way of working.

Isomorphic Labs is headquartered in King's Cross in London and has a second office in Lausanne, Switzerland at EPFL's Innovation Park.

L'art de l'ingénierie - Notre passion

Des solutions globales pour l'énergie, les infrastructures et l'environnement.

L'élaboration de projets spécifiques offre à nos collaborateurs des activités variées et stimulantes. Ils ont la possibilité de traiter des tâches de manière autonome et de développer ainsi leurs capacités créatives et innovantes. La collaboration interdisciplinaire leur donne un aperçu d'autres domaines spécialisés.

Nous encourageons de manière ciblée le transfert de connaissances entre les spécialistes expérimentés et les jeunes collaborateurs. Nous soutenons activement les jeunes spécialistes lors de leur entrée dans la vie professionnelle, notamment dans le cadre de stages et d'apprentissages. Outre la participation à des séminaires externes, à des congrès spécialisés et à des conférences, nous les soutenons dans le développement de leurs compétences.

Notre culture de travail se caractérise par des hiérarchies plates, des relations collégiales et un soutien mutuel. Nous favorisons l'esprit d'équipe en organisant des événements communs. Parce que nos collaborateurs sont la clé de notre succès, ils sont naturellement associés aux bénéfices de l'entreprise.

Le groupe Engineering emploie environ 300 collaborateurs répartis dans toute la Suisse.

Description

Nous effectuons la planification générale d'ouvrages d'infrastructures et exécutons des prestations d'ingénierie exigeantes en Suisse et à l'étranger. Nous disposons d'une expérience de longue date dans les domaines de l'hydro-électricité, des travaux souterrains, de l'hydraulique, du génie civil et du bâtiment. En tant que planificateurs d'installations techniques, nous disposons de connaissances approfondies dans l'étude et la réalisation des équipements électromécaniques. Nous intervenons dans les secteurs de la production et de la distribution d'électricité comme dans celui des installations d'exploitation et de sécurité. Nous proposons également des solutions de télécommunication.

Nos prestations comprennent les conseils, la conception, les études, le développement de projets et leur gestion. Dans le cadre de la réalisation de projets, nous assurons la direction des travaux, le suivi du montage et la mise en service des installations.

Activité(s) spécifique(s) : Des solutions globales pour l'énergie, les infrastructures et l'environnement

Description

Jane Street works differently. We are a quantitative trading firm active on more than 200 trading venues across 45 countries. As a liquidity provider and market maker, we help form the backbone of global markets. Our approach is rooted in technology and rigorous quantitative analysis, but our success is driven by our people.

Our bright, beautiful offices in the heart of New York, London and Hong Kong are open and buzzing with conversation. We hire smart, humble people who love to solve problems, build systems, and test theories.

People grow into long careers at Jane Street because there are always new and interesting problems to solve, systems to build, and theories to test. You'll learn something new every day in our office—whether it's connecting with a colleague to share perspectives, or participating in a talk, class, or game night. Our success is driven by our people and we never stop improving.

Job offers

- › Summer Internships
- › Full-time Graduate roles
- › Areas of specialization: Quantitative Trading, Strategy & Product, Software Engineering, Quantitative Research

KISTLER

measure. analyze. innovate.

Stand Thursday 12th
B14

Presentation Wednesday 11th
14:00, Room 2C

Description

Kistler, as a pioneer, has become a global market leader in dynamic pressure, force, torque and acceleration measurement technology, with know-how in a multitude of industries and applications. Ever since it was founded in 1959, the Kistler Group has grown hand-in-hand with its customers and employees.

Our claim: "measure. analyze. innovate." is getting to the heart of what we do: to measure means to understand – and understanding paves the way for change. Raw data is transformed into valuable information about what can be optimized in each individual process. We deliver high-caliber measurement technology and services that support our customers in advancing new technologies, delivering innovations and pushing the limits of what is feasible – Innovators work with Kistler.

Field(s) of activity : Dynamic Measurement Technology

Description

For over a century L'Oréal has been dedicated to one sole vocation: creating beauty. We remain true to the pioneering spirit of our founder and enjoy the unwavering support of his family, who have always accompanied our development.

Our goal is to offer each and every person around the world the best of beauty in terms of quality, efficacy, safety, sincerity and responsibility to satisfy all beauty needs and desires in their infinite diversity.

Research & Innovation is at the heart of the Group's strategy. At L'Oréal, there is no innovation without science, and that's what has made us different since 1909. It was the original gamble that Eugène Schueller took when he created the company.

Every day, more than 4,000 people work in our Research & Innovation centers around the world. They discover, invent and develop, providing a continuously improving response to the Beauty needs and aspirations of consumers, while the products they create are ever more

Field(s) of activity : Research & Innovation, Cosmetics

Labcorp is a global leader of innovative and comprehensive laboratory services that helps doctors, hospitals, pharmaceutical companies, researchers and patients make clear and confident decisions. We provide insights and advance science to improve health and improve lives through our unparalleled diagnostics and drug development laboratory capabilities. The company's more than 60,000 employees serve clients in over 100 countries, worked on over 80% of the new drugs approved by the FDA in 2022 and performed more than 600 million tests for patients around the world.

Job offers

- At Labcorp, you will collaborate with colleagues from around the world to support global studies and gain exposure to the complete drug development spectrum. Here, you'll work in a supportive environment where you can grow your career while helping advance life-saving medicines. While we work hard, we also value a flexible balance between your work life and personal life.

Required profiles

- Our Project Managers closely interact with clients and internal departments, to develop customized protocol specifications. Our clinical data managers interact with clients' data management departments to translate and transfer the Labcorp database into an electronic clinical file using a customized format that meets customer's needs and expectations. Our laboratory staff perform clinical laboratory tests; ensure compliance with regulatory guidelines and the validity of test results.

The Vital Electronic Component to Every Green Story

LEM – A global Swiss company powering a greener world

To realize a vision of a cleaner, greener planet, US leaders are harnessing the expertise of companies around the globe that offer deep expertise in the generation and control of electrical energy. LEM is just such a company. We engineer industry-changing solutions from renewable power generation to e-mobility and ensure that electrical systems are optimized, reliable and safe. With a Swiss heritage of precision, LEM delivers electronic components chosen by industry leaders to enable sustainable innovations that transform our world.

From making charging an electric vehicle as easy as filling up with gas and building efficient power systems for robotics to using solar and wind technologies to capture our renewable resources LEM helps to make the green dream a green reality.

Languages	English, French, German, Italian, Spanish
Location	Lugano, Zurich, Barcelona, Luxemburg, Bolzano, Hamburg, Chennai
Number of employees	Worldwide : 100 Switzerland : 50
Year of foundation	1998
Turnover	30 M CHF

Description

In 1998, a group of innovative mathematicians, physicists, computer scientists, and engineers founded Lifeware in Switzerland. The company has since become a leading provider of software solutions for the global life insurance market. Lifeware has rapidly expanded its reach, doubling the number of employees in less than three years.

Lifeware operates in Europe, North America and Asia. The company's unique offering lies in its Software as a Service (SaaS) model, providing cloud solutions from high-security data centers. This approach allows clients to have access to the latest software version, ensuring that they always have the most up-to-date solutions at their fingertips. Lifeware takes an agile approach to software development, using the «extreme programming» method to continuously improve its products.

The company's agile development process and commitment to continuous improvement allow it to deliver solutions in just 3-5 months, giving clients a significant competitive advantage in the market.

Job offers

- › You will find:
- › an international and buzzing team, committed to supporting and helping;
- › an informal and barrier-free working environment;
- › plenty of room to pick your challenges and responsibilities;
- › a dynamic and self-challenging company solution oriented;
- › a safe and fair-paid job place.

Required profiles

- › Mathematician, Computer Scientist, Physicist, or an Engineer from another field (with MSc or PhD) analytical thinking, creativity, and passion for programming. You are a dedicated person who tackles everything and gets them done. You are enthusiastic about programming and willing to learn. You embrace autonomy and exhibit a high degree of accountability. You master English on native level.

Description

Logitech helps all people pursue their passions and is committed to doing so in a way that is good for people and the planet. We design hardware and software solutions that help businesses thrive and bring people together when working, creating, gaming and streaming. Brands of Logitech include Logitech, Logitech G (including ASTRO Gaming, Streamlabs, Blue Microphones) and Ultimate Ears.

Key product categories include, Room and Video Collaboration solutions for businesses; Personal Workspace Solutions (keyboards, mice, webcams, mobile solutions); Gaming (including streaming); Audio and Music.

We ship more than 150 million products to more than 100 countries around the world every year. Yet, our culture is like that of a smaller company; a fast, lean, humble and hungry company. With more than 300 design awards in the last decade - including the prestigious Red Dot Design Team of the Year award, as a design company we place design at the center of everything we do, from innovative experiences and products to our approach towards sustainability.

WE ARE LOGI

We help all people pursue their passions in
a way that's good for the planet.

Description

Lombard Odier est un gestionnaire de fortune et d'actifs mondial de premier plan. Depuis plus de 225 ans, et tout au long des 40 crises financières qu'il a traversées, le Groupe a su conjuguer innovation et prudence afin de rester aligné sur les intérêts à long terme de ses clients privés et institutionnels. Exclusivement détenu par ses Associés-gérants, il dispose d'un bilan très liquide et il est fortement capitalisé. International dans son approche, le Groupe priviliege une indispensable proximité locale et place l'investissement durable et la responsabilité sociale au coeur de ses activités. Lombard Odier obtient d'ailleurs en 2019 la certification B Corp, l'une des plus avancées au monde dans le domaine du développement durable. Repensant sans cesse le monde de l'investissement, Lombard Odier a créé et développé une infrastructure bancaire de pointe et oeuvre à l'évolution constante de sa propre plateforme technologique, reconnue comme l'une des plus performantes du secteur. Lombard Odier a également été primé en 2021 en tant que « Best Private Bank for ESG Technology ».

Offres d'emploi

- Stages, Projets de Master et postes fixes dans différents secteurs de la Banque (IT, Asset Management, etc.). Venez sur le stand de Lombard Odier le vendredi 7 octobre 2022 pour découvrir ces offres, consultables également dans l'espace Carrières de notre site [www.lombardodier.com](#), et pour échanger avec nos Alumni EPFL de leurs expériences et de vos objectifs professionnels.

Profils recherchés

- Nous recherchons des jeunes talents récemment ou prochainement gradués en Master en Informatique, Système de Communication ou Ingénierie Financière. Votre motivation ainsi que votre passion pour les nouvelles technologies, associées à votre intérêt pour le monde bancaire seront quelques-unes des qualités qui vous permettront de contribuer au succès du Groupe Lombard Odier.

Description

Le bureau Lombardi est un groupe suisse d'ingénierie rassemblant plus de 800 collaborateurs répartis en Suisse et dans diverses filiales à l'étranger. Il offre des prestations d'ingénierie, de suivi de travaux et d'appui à la maîtrise d'ouvrage pour les projets d'infrastructures de transport (tunnels, chemins de fer, métros, autoroutes), les ouvrages hydrauliques (barrages, pompage-turbinage) ainsi que les équipements électromécaniques liés à ces ouvrages (turbines, ventilation, équipements de sécurité).

Fort d'une histoire riche de projets d'envergure (barrage de Contra, Gothard routier et ferroviaire), le bureau Lombardi est actuellement impliqué sur des projets majeurs tels que la construction du deuxième tube du tunnel du Gothard routier (17 km de tunnel), l'enfouissement de la ligne du LEB à Etagnières (1 gare souterraine et 800 m en tunnel), le nouveau barrage de Gornerli ainsi que l'aménagement de pompage-turbinage de Snowy (Australie). La plupart de ces ouvrages sont conçus en BIM.

Description

Lonza is a preferred global partner to the pharmaceutical, biotech and nutrition markets. We work to enable a healthier world by supporting our customers to deliver new and innovative medicines that help treat a wide range of diseases. We achieve this by combining technological insight with world-class manufacturing, scientific expertise and process excellence. Our business is structured to meet our customers' complex needs across four divisions: Biologics, Small Molecules, Cell & Gene and Capsules & Health Ingredients. Our unparalleled breadth of offerings across divisions enables our customers to commercialize their discoveries and innovations in the healthcare industry.

Founded in 1897 in the Swiss Alps, today, Lonza operates across five continents. With approximately 17,500 employees (full-time equivalent), we comprise high-performing teams and individual talent who make a meaningful difference to our own business, as well as to the communities in which we operate. The company generated sales of CHF 6.2 billion with a CORE EBITDA of CHF 2.0 billion in Full-Year 2022.

Description

We are curious minds dedicated to human progress. For more than 350 years, we've believed that science and technology are a powerful force for good. Across the divisions Healthcare, Life Science, and Electronics, it's our purpose to deliver the outcomes that matter for patients, consumers, customers and communities. We are here for people at every step, helping to create, improve and prolong life. We deliver personalized treatments for serious diseases and enable people to achieve their dream of becoming parents. Our innovations are unlocking the power and potential of data to open new possibilities to transform life on Earth as we know it. We believe that scientific exploration and responsible entrepreneurship are key to technological advances that benefit us all. This is how Merck has thrived since 1668. And we will continue to push the boundaries of possibility to create opportunities for everyone. This is what drives us. This is what we work for. This is our future.

Field(s) of activity : Biotechnology

Job offers

We care passionately about our colleagues, customers, patients, and the planet. That's why we support and nurture our employee's ideas, talents, and enthusiasm to advance human progress. Interested? Join us

MERCURIA

Energy & commodity trading a blend of both operational and financial challenges met with sophisticated risk management tools.

Geneva-based, Mercuria is one of the largest independent energy and commodity groups in the world. Our activities cover all aspects of trading including sourcing, logistics, blending, delivering and a strategic portfolio of assets. Underpinning all we do is a strong focus on risk management.

We conduct business in more than fifty countries across five continents. Our 1000+ people operate from a global network including major commercial hubs in Geneva, London, Beijing, Shanghai, Singapore, Calgary and Houston as well as regional offices.

In recent years, Mercuria has built upon a series of strategic acquisitions, including the physical commodities trading unit of JPMorgan Chase & Company, Noble Group's U.S. gas and power business and the Aegean Marine Petroleum Network, reorganized as Minerva Bunkering.

The Group continues its journey by forging pathways towards the energy transition and bringing added value, transparency and efficiency to the commodities trading world.

Description

Murex is a global fintech leader in trading, risk management and processing solutions for capital markets. Operating from our 19 offices, 2700 Murexians from over 60 different nationalities ensure the development, implementation and support of our platform which is used by banks, asset managers, corporations and utilities, across the world. Join Murex and work on the challenges of an industry at the forefront of innovation and thrive in a people-centric environment. You'll be part of one global team where you can learn fast and stay true to yourself.

Field(s) of activity : Edition de Progiciels Financiers

Job offers

Our global team relies on the twin pillars of software expertise and functional industry insight.

Consulting: working closely with the software development team, our consultants contribute to everything from product innovation to software delivery and support, providing technical and functional advice to clients, integrators and other internal teams. At Murex, consulting is the starting block for many career opportunities.

Development: our software developers define, build, deploy, upgrade and maintain high quality enterprise-scale software for the financial world.

Following an industrial development and delivery process, we overcome the associated challenges related to this dynamic market, including low latency, high throughput, 24-7 availability and the computation of highly complex algorithms.

Required profiles

Internships Every internship is tailor-made, depending on the needs of our teams, and typically can cover areas such as client support, application design and development, system and network database issues. But just know that wherever you go, your contribution counts. Our internships are open to final year students from engineering and business colleges keen to discover more about financial software consulting or technical/functional software development.

Graduates: we recruit graduates from a wide range of backgrounds and believe our culture is all the richer for that. What our graduates have in common is a curious nature and an attraction for challenge. In your studies - if you find yourself craving autonomy but could deliver in collaboration; if you longed to apply logical theory to a complex reality, and now, you're looking for a real-world challenge -then you'll fit right in at Murex!

Description

ONWARD is a medical technology company creating therapies to restore movement, function, and independence in people with spinal cord injury (SCI) and movement disabilities. Building on more than a decade of science and preclinical research conducted at leading neuroscience laboratories, the Company has received nine Breakthrough Device Designations from the U.S. Food and Drug Administration for its ARC Therapy™ platform. ONWARD® ARC Therapy, which can be delivered by external ARC-EX™ or implantable ARC-IM™ systems, is designed to deliver targeted, programmed spinal cord stimulation. Positive results were presented in 2023 from the Company's pivotal study, called Up-LIFT, evaluating the ability for transcutaneous ARC Therapy to improve upper extremity strength and function. The Company is now preparing regulatory approval submissions for ARC-EX for the US and Europe. In parallel, the Company is conducting studies with its implantable ARC-IM platform, which demonstrated positive interim clinical outcomes for improved blood pressure regulation following SCI in 2022.

Description

Open Systems delivers cybersecurity beyond expectations. We partner with organizations to boost the security performance of their digital transformations. Our award-winning Managed Detection and Response (MDR) and Secure Access Service Edge (SASE) services connect and protect customers today, while increasing their security maturity for tomorrow.

Open Systems' Mission Control SOCs and NOCs are staffed by certified, outcome-obsessed engineers who provide 24x7 global coverage. They leverage a platform backed by data science and years of finetuning complex processes to better understand and reduce attack surfaces. Our deep expertise as a 5-time Microsoft Gold Partner accelerates and simplifies the path to security maturity by unlocking the value of existing investments in Microsoft security tools. Deployed in nearly 10,000 locations across 184 countries, Open Systems has earned an out of this world 97% retention rate. No wonder our customers call it crazy good cybersecurity. Description

If you thrive in an environment where you are propelled to new limits every day, then Optiver is the place for you. So, what is it that we do and why does it lie at the cutting-edge of technology, trading and research?

A never-ending pursuit of excellence. We are market makers. In simple terms, we provide bid-ask prices for financial products in exchanges all over the world. This creates the liquidity needed to keep the markets viable and allow everyone to trade at will. In essence, we improve the market and give it stability even in times of extreme volatility. It's a responsibility we don't take lightly but that also makes what we do so exciting.

Pushing the envelope one idea at a time. Every day at Optiver is an opportunity to solve the seemingly impossible. For you to build, code, develop and strategise something that pushes the boundaries of technological and analytical possibility. Every team member has an integral part to play in this endeavour. From traders, developers, engineers, researchers and support, we all strive towards finding solutions to complex problems.

Description

Working at the intersection of finance, mathematics and technology, Oryctéope creates, develops and improves proprietary trading strategies for group companies, to capture opportunities and manage risk in the most competitive financial markets around the world. We strongly believe that superior results can be achieved by working as a team rather than individually, and we constantly strive to prove our point.

As the European servicing hub of the internationally renowned TransMarket Group, we don't just believe that building exceptional teams will lead to success: TMG has a 40+ year track record of doing so. Our collaborative, entrepreneurial environment gives each talent day 1 responsibilities, supporting continuous growth through practical experience and structured training programs.

We develop our edge through expertise, quantitative research, algorithms, and infrastructure to produce systematic trading solutions which beat the market and contribute significant liquidity across global markets, facilitating price discovery and risk transfer. If you have what it takes, get in touch.

Description

Depuis plus de 180 ans, Patek Philippe s'attache à perpétuer le grand art horloger traditionnel genevois. Dernière manufacture genevoise indépendante en mains familiales, la marque bénéficie d'une totale autonomie créative qui lui permet de concevoir, produire et assembler ce que les spécialistes s'accordent à reconnaître comme les meilleures montres du monde. Grâce à son savoir-faire d'exception, Patek Philippe préserve une tradition d'innovation couronnée par un important répertoire de plus de 100 brevets.

Patek Philippe a toujours recherché la perfection, en créant des garde-temps d'une qualité et d'une fiabilité sans égales. Des montres précieuses se distinguent par leur exclusivité et leur rareté, un héritage unique à transmettre de génération en génération. Pour maintenir ce niveau d'excellence, la firme investit dans l'innovation liée aux nouveaux matériaux et aux technologies de pointe, tout en préservant la tradition du grand art horloger et en appliquant les standards de contrôles de qualité les plus sévères de toute l'industrie.

Description

PHIDA est un groupe familial basé à Renens, actif dans 4 secteurs d'activité : la Construction, l'Événementiel, le Service, ainsi que l'Investissement.

Historiquement présent dans le domaine de la Construction comme un acteur phare de l'enveloppe du bâtiment, le Groupe s'est ensuite développé via des acquisitions dans le secteur de l'Événementiel et la création de sociétés de services aux entreprises. Des investissements dans des start-ups sont également réalisés lorsque les projets sont en adéquation avec notre vision.

Orienté vers l'avenir, le Groupe poursuit son développement grâce à des équipes réparties dans une vingtaine de sociétés en Suisse romande et une en France.

Plus que des valeurs, l'esprit de famille, la confiance, la loyauté, le respect et l'humain font partie de l'ADN de PHIDA.

Dans cet esprit, le Groupe est très attentif au développement professionnel ainsi qu'à l'équilibre personnel de ses collaborateurs. Nous accompagnons chacun d'entre eux de différentes manières pour les aider à s'épanouir.

Activité(s) spécifique(s) : Construction, Services aux entreprises, Événementiel, Investissement

Offres d'emploi	Profils recherchés
<ul style="list-style-type: none"> › Pour notre secteur de la Construction, nous recherchons des conducteurs de travaux. PHILIP MORRIS
INTERNATIONAL

Stand Thursday 12th & Friday 13th L07

Presentation Monday 9th
11:00, Room 5C

Interview box Thursday 12th & Friday 13th

Description

Ready to be surprised ? An internship at Philip Morris International offers a lot more than you might expect. You'll be part of a global organisation, with endless opportunities. You'll have the space to think for yourself and try out new ideas. It's a chance to start off your career with the backing of an international business behind you, but with the freedom you'd normally find in a startup.

Right now, we're completely rethinking our products, working towards a smoke-free future, we're making history and it'll change PMI and the rest of the tobacco industry forever. That means doing things that haven't been done before. That's why we value your perspectives and fresh thinking. We'll play to your strengths, getting you involved in projects that match your skills and interests. For those who enjoy taking responsibility for their own development, our internships are where you can push yourself. For those who are inspired by the chance to shape the future of a global industry, PMI is the place to be. Join us.

Field(s) of activity : Tobacco, Life Sciences, Engineering

Job offers

We have opportunities across all areas of our business. And as a global player, this could be just the start of your career journey. Come and talk to us about roles in:

- › Operations;
- › Finance;
- › Marketing;
- › Science;
- › Engineering;
- › And more.

Required profiles

We're not looking for people with qualifications in a specific area. We're more interested in what you can bring as an individual, and where you see yourself going in the future.

The qualities we are looking for are:

- › analytical thinking,
- › problem-solving,
- › customer focus,
- › innovation that matters,
- › personal growth mindset and communication skills

Brilliant teams. All it takes is the right people.

Description

P&G was founded over 180 years ago as a simple soap and candle company. Today, we're the world's largest consumer goods company and home to iconic, trusted brands that make life a little bit easier in small but meaningful ways. We've spanned three centuries thanks to three simple ideas: leadership, innovation and citizenship. The insight, innovation and passion of talented teams has helped us grow into a global company that is governed responsibly and ethically, that is open and transparent, and that supports good causes and protects the environment. This is a place where you can be proud to work and do something that matters. From Day 1, you'll help fulfill our purpose of improving lives for 5 billion consumers in 180 countries through leading, billion-dollar brands such as Pampers, Oral-B, Head & Shoulders, Gillette, Ariel and Always, among 65 others. We always begin with the consumer in mind, and then we see how our brands can go beyond while leading industry-changing technology such as collaborative robots, motion sensors, Blockchain, and new polymer developments.

Description

With over 40,000 colleagues around the world, Richemont is the owner of 27 prestigious Maisons, recognised for their excellence in jewellery, watches, fashion and accessories, and distinguished by their craftsmanship and creativity.

Each of our Maisons and businesses have their own management team to lead design, product development, manufacturing, marketing, communication, distribution, and customer services in order to preserve their distinctiveness.

As a family-spirited group, Richemont takes a long term view in nurturing its Maisons and businesses. The Group supports them in creating exceptional products, true to their heritage and in line with their values. We help them to thrive in new and existing markets, to set unparalleled standards of service, and to create memorable experiences for today's highly sophisticated customers, who are at the core of our approach.

We are united in our constant quest for creativity, innovation, and excellence.

Richemont is also recognised to be one of the Most Attractive Employers in Switzerland by Universum.

Description

Une réputation inégalée de qualité et de savoir-faire

Rolex, manufacture horlogère suisse établie à Genève, est réputée dans le monde entier pour son savoir-faire et la qualité de ses produits. Ses montres Oyster Perpetual et Perpetual, toutes certifiées Chronomètre Superlatif pour leur précision, leurs performances et leur fiabilité, sont symboles d'excellence, d'élégance et de prestige. Inscrit sur chaque montre Oyster, le terme « Perpetual » représente bien plus qu'un mot sur un cadran, c'est une philosophie qui incarne la vision et les valeurs de la marque, une recherche perpétuelle de l'excellence que le fondateur Hans Wilsdorf a transmise à l'entreprise. Rolex est ainsi à l'origine de nombreuses innovations horlogères majeures, dont l'Oyster, première montre-bracelet étanche, née en 1926, et le remontage automatique par rotor Perpetual, inventé en 1931. Rolex a déposé plus de 600 brevets depuis sa fondation.

Activités spécifiques : Horlogerie et microtechnique

OYSTER PERPETUAL AIR-KING

ROLEX

LE CIEL À PORTÉE DE MAIN

Un hommage aux pionniers de l'aviation. Lancée en 1958, l'Air-King célèbre les pilotes des années 1930 et le rôle des montres Rolex Oyster dans l'épopée aérienne. Son cadran noir distinctif affiche l'échelle des minutes au premier plan pour une lecture optimale des temps de navigation. Dotée d'un boîtier redessiné avec un épaulement de protection de la couronne et d'un cadran équilibré pour une meilleure lisibilité, elle confirme son statut parmi les montres Professionnelles Rolex et ne cesse de repousser les limites. **L'Air-King.**

#Perpetual

Offres d'emploi

La passion de la qualité fait intégralement partie de l'identité de Rolex. La marque recherche des femmes et des hommes excellant tant par leurs connaissances théoriques et leur savoir-faire pratique que par leur savoir-être des personnes désireuses de valoriser leurs compétences au service d'une entreprise pionnière misant résolument sur les ressources de l'ingéniosité humaine en matière de créativité et d'innovation.

Description

La société Rollomatic est une entreprise privée suisse spécialisée dans la conception et la fabrication de machines CNC de haute précision pour l'affûtage d'outils coupants, la rectification cylindrique et la découpe par laser d'outils en matière ultra-dure.

Orientée client, elle fournit des solutions complètes pour la réalisation d'outils de précision, en passant du profilage des meules à la mesure des pièces finies.

Les outils de coupe nécessaires à la fabrication des smartphones, tablettes, avions, automobiles et appareils médicaux sont des produits High-Tech réalisés sur des machines de haute précision.

Depuis sa création en 1989, Rollomatic conçoit, fabrique et commercialise ces systèmes de production dans le monde entier, innovant constamment dans l'industrie numérique afin de développer de nouveaux processus d'usinage. Elle consacre une importante partie de son travail à la connectivité des machines, la surveillance des processus à distance, le traitement de l'information et oriente ses recherches vers la 4ème génération industrielle.

Description

Schindler mobility solutions move one billion people every day all over the world. Founded in Switzerland in 1874, Schindler is a leading global provider of elevators, escalators and related services. Its innovative and environmentally-friendly access and transit-management systems make an important contribution to mobility in urban societies.

We are looking for highly skilled graduates with a creative mind and an enthusiastic attitude. Our interdisciplinary projects require in-depth domain expertise and the willingness to tackle varying challenges, e.g. the development of energy-efficient drives, battery technologies, data analysis & sensors, new materials or intelligently designed software & algorithms for traffic management systems in buildings.

We actively promote and support your professional and personal development. Through the «Schindler Career Development Program», we seek out the most talented young professionals each year and send them on a six-year international and multidisciplinary journey. Join us in moving the world's population. Be Schindler. Be Elevated.

sdplus

Description

Fondé il y a plus de 65 ans par Messieurs Schindelholz et Dénériaz, le groupe "sd" s'est implanté au fil des années sur l'ensemble du territoire de la Suisse romande. Dans les années 90, le groupe renonce à ses activités de construction et de promotions immobilières pour se recentrer sur l'ingénierie civile.

Depuis plus de 20 ans, porté par un développement organique régulier et des acquisitions ciblées, le groupe vit une croissance maîtrisée de ses effectifs et activités.

Unies sous l'appellation sdplus à partir de 2010, nos six entités (sd ingénierie – biol conseils – sittel consulting – planeo conseils – sensorscope – geolutions) offrent des compétences complémentaires.

Activité(s) spécifique(s) : Infrastructures publiques, Mobilité et transports, Eau, Environnement, Planification, Structures, Géotechnique et travaux souterrains, Génie Civil

Offres d'emploi

Vous avez le sens des responsabilités?
 Au sein de notre groupe vous appréciez l'autonomie offerte qui vous permet une appropriation enrichissante de vos projets.
 Vous souhaitez agir localement?
 Implémenté dans tous les cantons romands, nos sociétés se distinguent par leurs dimensions humaine et locale.

Description

Sécheron Hasler Group is an expanding global provider of safety components and systems for the railway sector and various industrial segments engaged in the manufacturing of high-power electric equipment.

With a century-long legacy of achievements and innovations, our two foundational companies, Sécheron and HaslerRail, have played pivotal roles.

All essential competencies for our endeavors, spanning domains like electrics, electronics, software, hardware, material sciences, and crucial production processes, are internalized, facilitating a comprehensive grasp of pertinent technologies.

Our operations encompass a worldwide network of facilities, encompassing design, engineering, production, testing, sales, and post-sales service.

Our worldwide footprint is further reinforced by an extensive array of proprietary sales offices and partnerships. This positioning empowers our organization to establish closer connections with our clientele, enabling the infusion of localized elements into our deliverables and the provision of on-site services.

Description

Sentec - a «deeptech» company, researches, develops, manufactures and sells noninvasive, digital sensor systems to specialized hospitals departments and to homecare providers worldwide. We offer really meaningful work on products that are life saving or support the therapy of patients in an effective manner.

Sentec believes in a flat organizational structure, and in a truly interdisciplinary working community in which employees are empowered to share ideas, speak up and make important decisions themselves.

Sentec technology provides continuous, noninvasive ventilation monitoring regardless of lung compromise or ventilation strategy. With transcutaneous monitoring clinicians can quickly identify trends, rapidly and accurately assess patient status, and make more well-informed, timely care decisions across several application areas:

- **Neonatal and Pediatric Intensive Care:** Keeping your sights on CO2 values can help deliver gentle and effective ventilatory support for the individual patient - support that protects the neonatal brain without damaging premature lungs.

- **Acute Respiratory Care:** Continuous, accurate tcPCO2 and SpO2 values add to the clinical picture without additional lab draws on patients regardless of ventilation method.

- **Diagnostic Sleep Medicine and Home Ventilation Management:** In sleep diagnostics, continuously monitoring CO2 levels is important to assess nocturnal hypoventilation and titrate noninvasive ventilation. Transcutaneous monitoring can be done from the comfort of the patient's home.

- **Anesthesia and Post-Operative Care:** Anesthesiologists manage treatment of clinical patients in almost every department of the hospital. The Sentec Digital Monitoring System extends the standard of care to patients without airway or arterial line access.

Field(s) of activity : Noninvasive (transcutaneous) blood gas (CO2 and O2) monitoring and pulse oximetry)

Description

SGI est un bureau d'ingénieur conseil basé à Genève avec des activités en Suisse, en France et en Afrique. Animé par une équipe impliquée et passionnée, SGI accompagne ses clients avec disponibilité et responsabilité, apportant sa vision globale sur les projets depuis leur genèse jusqu'à leur exécution et leur livraison.

Toujours à l'écoute des attentes et besoins de ses maîtres d'ouvrage, SGI apporte toute la réactivité et la qualité que les projets méritent. Nos activités s'articulent autour de trois métiers: le bâtiment/structure, l'hydraulique et les infrastructures.

Pour nos clients, nous concevons et réalisons des projets dans les domaines tels que mobilités douces, transports, utilisation d'énergie (hydrothermie), réseaux de distribution CAD/FAD, alimentation en eau potable, assainissement et traitement des eaux, gestion des eaux pluviales/ vulnérabilité au changement climatique, bâtiments d'habitations, bâtiments industriels. Nous intervenons à la fois en Suisse Romande et à l'international, principalement en Afrique.

Activité(s) spécifique(s) : Hydraulique, infrastructures, énergie

Description

Swiss International Air Lines (SWISS) is Switzerland's largest air carrier. With one of Europe's most advanced aircraft fleets, SWISS is a premium airline that provides direct flights from Zurich and Geneva to keep Switzerland connected with Europe and the world.

Its Swiss WorldCargo division offers an extensive range of airport-to-airport airfreight services for high-value, time-critical and care-intensive consignments.

As The Airline of Switzerland, SWISS embodies its home country's traditional values and is dedicated to delivering the highest product and service quality.

The company has also set itself ambitious carbon targets, and plans to halve its 2019 net carbon dioxide emissions by 2030 and make its business and operations entirely carbon-neutral by 2050, particularly by promoting the use of sustainable aviation fuels.

SWISS is part of the Lufthansa Group and is also a member of Star Alliance, the world's biggest airline network.

Field(s) of activity : Airline

Description

Swiss Life Select apporte de la transparence sur un marché suisse complexe. Afin de répondre exactement aux besoins et objectifs de leurs clients, les conseillers Swiss Life Select sélectionnent, parmi un large éventail de 60 partenaires financiers, le produit le plus adapté pour eux. Swiss Life Select optimise les finances des particuliers dans toutes les couches de population.

Swiss Life Select dispose d'un choix de marques et d'une gamme uniques. Les conseillers financiers peuvent ainsi proposer des solutions sur mesure à leurs clients.

Swiss Life Select ne distribue aucun produit financier propre.

Notre approche de conseil est centrée sur la planification financière globale, qui prend en considération tous les événements de la vie, de la naissance à la retraite.

En tant que «House of Brands» du secteur financier, Swiss Life Select propose une sélection Best Select qui présuppose un libre choix des produits.

Activité(s) spécifique(s) : Planification financière

Offres d'emploi

Ce que Swiss Life Select propose:

- › Une formation et un perfectionnement on the job
- › Une gamme de prestations étendue et ciblée sur la clientèle répondant à l'approche Best Select
- › Le libre aménagement du temps, une activité indépendante
- › Des perspectives de revenus supérieurs à la moyenne
- › Un contexte entrepreneurial
- › Des opportunités de carrière et d'avancement uniques basées sur des résultats clairement mesurables
- › Aucune différence de salaire entre hommes et femmes

Profils recherchés

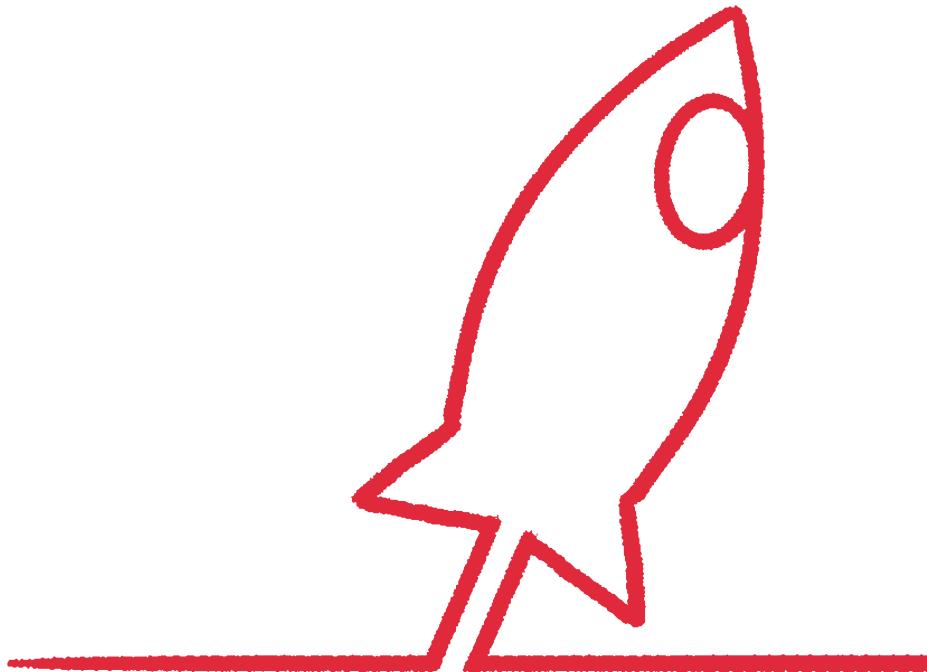

Vous avez la capacité de penser en réseau, êtes bon communicateur et orienté(e) service. Le client et ses besoins personnels se situent pour vous au premier plan. Vous êtes axé(e) sur les objectifs et la performance, ouvert(e) aux nouveautés et à l'aise dans les contacts avec les clients. Votre réputation est irréprochable. Vous vous exprimez et écrivez avec facilité en français.

Stagner ou progresser?

Nous soutenons celles et ceux à la recherche d'un nouveau défi dans la planification financière.

Vivre en toute liberté de choix.

Description

The Swiss National Bank provides a diverse and stimulating range of activities that offer the perfect entry into professional life. Our primary goal is to fulfil our statutory mandate of conducting a monetary policy that serves the interests of Switzerland as a whole. In doing so, we perform a variety of tasks, including analysing the real economy and the financial sector, steering the Swiss franc money market and managing our foreign currency investments, ensuring the supply and distribution of cash, securing the operation of cashless payment systems, and promoting international monetary cooperation. This broad spectrum of complex tasks makes our work both fascinating and challenging.

Field(s) of activity : Central banking

Job offers

Career-launching opportunities for graduates and students in the fields of economics and information technology.

We offer a high-quality work environment that supports your personal development and promotes your individual strengths. Life-long learning and work-life balance are more than just buzzwords for us and we cultivate an atmosphere of cooperation, respect and diversity within our teams. Each one of us makes a significant contribution to the successful fulfilment of our mandate.

Required profiles

- › Economics
- › Finance
- › Information Technology

In addition to solid expertise, we look for enthusiasm, communication skills, creativity and a sense of responsibility.

Together we are truly in a class of our own!

Toutes les communications numériques de la Suisse passent au travers du réseau Swisscom.

Toutes les communications numériques de la Suisse - Internet, voix, télévision, finances et téléphonie mobile - passent au travers du réseau Swisscom.

Nous devons nous assurer que ce réseau est le plus fiable, le plus performant et le plus efficient qui soit.

Pour y parvenir, toutes les couches de notre réseau et de notre infrastructure informatique sont aussi robustes et simplifiées que possible. Nous nous inspirons des concepts du développement logiciel pour les adapter au monde du réseau, afin de porter l'automatisation des tests et des opérations à un niveau totalement nouveau.

Description

Founded by two engineers, Swissquote makes trading opportunities accessible to everyone, and we challenge everything that makes traditional banking irrelevant. Join our software developers to challenge the code and bring your expertise to cutting-edge Fintech projects. As an always-evolving company, we strive to challenge our organization, making teamwork and innovation more than just values. You can accelerate your career in a fast-moving and rock-solid company: our bank has become the Swiss leader in online trading these last couple of years. We still keep growing and delivering exceptional results, just like last year. Join our team of software developers & IT engineers near Geneva to work on exciting FinTech projects and grow your skills with state-of-the-art tech stack:

- › Backend: Java, Spring, JAX-RS+Jersey, Hibernate...
- › Frontend: JavaScript, TypeScript, React, Redux, PostCSS, Jest...
- › DevOps: Docker, Kubernetes...

Know more during our presentation and come at our booth to have a talk with our team.

Field(s) of activity : e-Trading, e-Forex, Cryptocurrencies, Software Engineering, Banking Applications

Job offers

We're looking for talented Junior Software Engineers ready to become tomorrow's rockstars in the leading online bank in Switzerland. As a Junior Software Engineer you'll join our Tech Talent Academy where you'll be trained by our Software Engineers in the best practices of the industry and in our architecture and business domains.

Description

We are the world's largest independent energy and commodities trading company. Every day we use our expertise and logistical networks to distribute energy around the world, efficiently and responsibly.

From 40 offices worldwide, we seek to add value across the energy supply chain, including deploying our scale and market understanding to help facilitate the energy transition.

To date, we have committed over \$2.2 billion of capital to renewable projects, and are identifying and developing low-carbon opportunities around the world.

Field(s) of activity : Energy, IT, Transportations

Description

An idea is a powerful thing. But a lot has to happen before an idea becomes an innovation—something that changes the world.

That's what we do for a living.

We're Zühlke, the global innovation service provider. We work with interesting, ambitious companies, helping them bring their ideas to the world.

It's incredibly challenging, invigorating and rewarding work.

It's also difficult work.

Work that demands courage, rewards curiosity and insists on integrity—on being honest with ourselves and true to our values and standards.

When it all comes together, it's the most exciting work you can do. If that sounds like the kind of place to spend a career... we'd love to talk.

Offres d'emploi

Agile software engineering is at the technological heart of Zühlke's business. Within this field, we are interested in hearing from people straight from university for our graduate roles and internships, as well as those already forging a career in technology, engineering or business. We're a team of generalists in which software architects, mobile, web and full-stack engineers all feel equally at home.

Required profiles

Two-thirds of Zühlke's employees are software engineers. Some are generalists, many specialise in mobile, web, embedded or cloud development. They work together across all our disciplines to find the optimal combination of a successful business case for our customers, good UX and exciting technologies that match the requirements.

REMERCIEMENTS

Au nom de tout le comité du

Nous souhaitons remercier toutes les parties impliquées dans l'organisation de cette 41ème édition sans lesquelles cet événement ne pourrait avoir lieu.

Nous remercions également tous les participants pour leur confiance et leur fidélité, et leur souhaitons un Forum plein de succès.
